

D803sp - Single Line Analog Deskset Telephone - 3 button Programmable

The D800 Series phones are Inn-Phone®'s newest addition to its hospitality analog room telephone product line. The D800 Series product line features a single line analog room telephone with a contemporary design that compliments the latest trends in hotel room designs. The D800 Series is available in three configurations: D800 basic, D800SP with a speakerphone option and the D803SP which provides a speakerphone and three programmable service buttons.

Utilizing the field proven and industry respected audio electronics and Heavy Base design features of previous generation Inn-Phone products, the design of D800 Series helps minimize breakage as compared with other room phones. The Heavy Base extends product life, minimizes potential for damage caused by phones that are more easily dragged from night stands or desks and helps control expense for room phone maintenance.

The D800 Series offers the reliability and durability of all Inn-Phone room telephone offerings with a sleek modern design, easy to use dial pad and enhanced face plate layout area. Customized face plates are available for all three D800 Series products.

The D800 Series provides a reliable, sophisticated, upscale room telephone design at very affordable pricing. Contact Inn-Phone for a free sample or quote today!
